The Role of Youth in Preventing Violent Extremism through Sport

The **Global Sports Programme** and the **State of Qatar** will host a side event about the **effective incorporation of youth perspectives in PVE-through-sport policies and plans**. It will promote the multilateral nature of sport-for-PVE efforts by gathering athletes, young leaders, policymakers, and regional organizations' representatives to foster cooperation in the use of sport-for-PVE. Recommendations to pursue human rights-based and youth-centric PVE practices through sport will be presented together with the new Guide for Policymakers for the Use of Sport for the Prevention of Violent Extremism.
