

NAHANTERS, YOUR FUTURE WITH **SOLAR POWER** IS LOOKING...

*A team of volunteers from Nahant has partnered with residents from Swampscott and Salem to join **SOLARIZE MASS PLUS**, a state agency-sponsored program designed to streamline the process (and costs!) of adopting greener technologies for homeowners and small businesses.*

WHY GO GREEN?

MAKE GREEN: Not only can you receive both federal and state tax credits, you can also receive **SMART** money (tariff-based incentives paid directly to you by National Grid) for the total energy that your PV system generates.

SAVE GREEN: Adding **green technologies** can significantly lower your home energy bills.

BE GREEN: Reducing our **carbon footprint** is a meaningful way that we can **contribute** to our community and the planet.

WHY NOW?

Three installers have been **carefully selected**, each offering a different **green technology option ... PV panels, air-source heat pumps, and solar hot water.**

Our campaign is launching now, and homeowners have between 4-6 months to **leverage the deals** offered by these installers.

The earlier you sign up for a technology, the **earlier it will be installed.**

Don't miss your chance to MEET THE INSTALLERS on November 7

BRIGHTER

Nahant is participating in **Solarize Mass Plus**, a program administered by the **Massachusetts Clean Energy Center (MassCEC)** and the **Green Communities Division of the Department of Energy Resources (DOER)**. We are partnering with our neighbors in Salem and Swampscott to maximize the **cost savings** through group purchasing, and **streamline the process** of choosing and installing **clean energy technologies** for homeowners in all three towns.
