Conference Room 7 (CR7) 3 - 7 pm EST

United Nations Headquarters, New York City
#AUDACITYAI

Co-Chaired by Kunal Sood and H.E. Stan O. Smith

Executive Overview

AUDACITY UNGA 100 Disruptors Summit hosted and curated by Kunal Sood, founder of AudacityAI and WE THE PLANET in partnership with The Permanent Mission of the Commonwealth of The Bahamas, galvanizes global leaders who exemplify audacious leadership at their core. AUDACITY UNGA 100 Disruptors Summit seeks to democratize access to real world solutions to unlock our individual and collective human potential in the Age of AI. Through the four cornerstones of Service, Community, Self-Development, and Purpose-Driven Leadership, AudacityAI gives us the capability to enhance and save lives in unprecedented ways. By connecting value driven investments in sectors like AI and Human Agency, Longevity and Leadership, and Architecting Collective Spaces for Humans and Nature, we aim to harness our moral courage and practical wisdom to lead with purpose and impact in the Age of AI.

On the 80th Anniversary of the United Nations, we recognize that investing in our individual and collective human potential has become increasingly necessary to sustain life and achieve global prosperity. In an increasingly disruptive era, we are presented with unprecedented opportunities to reimagine our social architecture and what it means to be human.

The time is now to highlight solutions that can expand human interoperability and imagination necessary to answer the urgent question: **How can humanity unlock our limitless potential in the Age of Artificial Intelligence to serve, protect, and invest in all Life on Land and Under the Sea.** Together, we can begin to shift the narrative from global conflict to global cooperation, to bring positive disruption and accelerated execution to the 2030 Agenda to realize the UN Global Goals.

Objectives

AUDACITY UNGA 100 Disruptors Summit in its second annual year is highlighting audacious leaders playing critical roles in harnessing our collective human potential for peace and

prosperity within ourselves and across the planet. When the High-Level Week of the 80th Session of the United Nations General Assembly begins, it will have been a decade since the implementation of the Sustainable Development Goals. In times of great division, when humanity is undergoing profound changes and facing an uncertain future, audacious leaders who can **translate vision into reality** are essential to shaping the next decade.

The Event will be held on 26th September 2025 at the UN Headquarters in New York City to highlight transformative work being done in communities around the world. WE THE PLANET and The Permanent Mission of The Bahamas invite a select group of global stakeholders to explore how together we can democratize access and encourage investment in leadership, longevity, and global solutions for people and our planet.

AUDACITY UNGA 100 Disruptors Summit unites committed leaders during the United Nations General Assembly High-Level period who will be called upon to use their unique global platforms to realize the aim of achieving planetary wellbeing for all life on land and under the sea.
